

How To Setup Appcode for Outlook/Mobile

The screenshot shows the Zimbra web interface with the 'Preferences' tab selected. A red arrow points to the 'General' link in the left sidebar, with the word 'Click' written in white. The main content area displays the 'General' settings, including a 'Sign in' section with a 'Password' field and a 'Change Password' link. Below this is the 'Appearance' section with dropdowns for 'Theme' (Harmony), 'Font' (Standard), 'Display Font Size' (Normal), and 'Print Font Size' (12pt). The 'Time Zone and Language' section shows 'Time Zone' set to 'GMT +08:00 Irkutsk (RTZ 7)' and 'Language' set to 'English (United States)'. There is also a 'Compose Direction' dropdown set to 'Left to Right' and a checkbox for 'Show direction buttons in compose toolbar'. At the bottom, there is a 'Search' section with a 'Search Folders' checkbox.

The screenshot shows the Zimbra web interface with the 'Accounts' tab selected. A red arrow points to the 'Add Application Code' button, with the word 'Click' written in white. The main content area displays the 'Accounts' settings. The 'Account Name' is set to 'Primary Account'. The 'Settings for Sent Messages' section includes a 'From' dropdown set to 'user@demo.com', a 'Reply-to' checkbox, and a 'Signature' dropdown set to 'Manage your signatures ...'. The 'Account Security' section shows 'Using two-step authentication' with a link to 'Disable two-step authentication ...'. Below this, it says 'One-time Codes: 10 unused codes View' and 'Trusted Devices: You have 0 trusted device revoke this device revoke all other devices'. The 'Applications' section has a heading 'Create passcodes for applications that don't support two-step authentication' and a table with columns 'Name', 'Created', and 'Last Used'. The table is empty, and the text 'No results found.' is displayed. At the bottom, there is a 'Delegates' section with the text 'The following users have delegated authority to this account' and a table with columns 'Name' and 'Type'.

One application code only can use for one device/app.
Example: You need to generate
1 x application code for Outlook
1 x application code for Mobile

1. Enter your application name.
(Example: Outlook, mobile..etc)

Add Application Code

If your application does not support two-step authentication, generate a passcode to authorize the application the first time you use it to sign in to your account.

Application Name: Outlook

Next

Click

Delegates: The following users have delegated authority to this account

No results found.

Preferences

Account Name: Primary Account

Settings for Sent Messages

From: Choose what appears in the "From" field of email messages

Reply-to: Set the "Reply-to" field of email messages

Signature: Manage your signature

Account Security: Using two-step authentication

One-time Codes: 10 unused codes

Add Application Code

Enter this passcode when using the application for the first time to sign in to your account. This passcode gives your application permission to access your account.

Application Passcode: HNZVCXGHWMOEJNL

Copy

1. Use this code as password to setup email account in Outlook/Mobile.

Note: Existing account just update the password when it prompts.

Delegates: The following users have delegated authority to this account

No results found.
